

AQUAEL

GLOSSY

GLOSSY – the sleek elegance

AQUAEL introduces GLOSSY – an exclusive line of freshwater aquarium kits.

GLOSSY is a brand-new and unique product line, the first of its kind on the market. The aquarium kit includes a special elevated tank. A lid with inbuilt lighting is glued to the inside of the upper part of the tank. Thanks to this innovative solution, the aquarium looks like a solid piece of glass with an elegant black band at the top. Being a highly original decorative element, a GLOSSY aquarium will suit any modern interior.

The lids of GLOSSY tanks are equipped with advanced T5 lighting to ensure the proper growth of aquarium plants. At the back of the lid, there are special openings for the hassle-free installation of canister filters and other aquarium devices.

The GLOSSY kits are ideal for the setting up of plant aquariums as well as biotope and traditional mixed aquariums. They are available in three sizes, ranging from 80 to 120 cm in length. You can also purchase a special tank stand to go with a GLOSSY aquarium. The tank stand is designed in the same style and is manufactured of high-gloss panels. Together, they will form a compact stylish body that sparkles with elegance.

- a uniquely stylish appearance
- light and modern
- elegant tank stands (not included)
- efficient T5 lighting
- hassle-free installation of canister filters and aquarium accessories
